

Nestor Martin IQH33 Modern Inset Multifuel Stove

<https://www.calonyradref.co.uk/nestor-martin-iqh33-modern-inset-multifuel-stove>

The IQH 33 inset stove has a contemporary, modern design that will make a stylish focal point for any room. Our exclusive Woodbox® combustion technology produces a high-performance burn to get more energy out of your fuel and create flames that will fill your elongated fire chamber. The large glass front gives a great view of these flames and really helps to project a warming ambience into the room.

This stove is equipped with white, cast iron, internal, protection plates to reflect heat out into the room; these decrease the heat energy lost up the chimney and to the surrounding masonry, which is especially important for inset stoves. The IQH 33 has a nominal output of 9kW, which is capable of heating large rooms that would otherwise be cold. There is also a remote control available to make it that much easier to create a comfortable and cosy environment for all to enjoy.

The IQH33 4 Sided-Frame model, with its sleek design finishing flush with the wall, is perfect for the modern home

The IQH33 is available with a 50mm frame option. Please speak to us if this is required.
