

Chilli Penguin "Stock Cube" Eco Wood Burning Stove

<https://www.calonyradref.co.uk/chilli-penguin-stock-cube-wood-burner-stove>

The Stock Cube is beautifully simple to control, there is one air control knob. This is both the air boost, when fully extended and finer control when eased inwards. It comes with an air control tool to help you judge the boost control, but can equally just be operated by hand. Wood burns better on a bed of ash, but when you do want to empty it, you just scoop it out from the base of the firebox. You can fit a small kettle or saucepan on the top surface.

This penguin is clear, determined, honest and single minded. It doesn't compromise, it is a wood burner only. It is built to be strong, simple, efficient and clean burning. If you want a 5kW wood burner, squarer and deeper than our Woody.. this could be your penguin. This penguin will be a true and honest friend, to warm you on those Chilli winter nights.

The Stock Cube is a wood only stove. The wood sits right on the vermiculite bricks on the base of the stove, there is no need for a grate. It has a generous fire box, sized for logs 300mm long and an even more generous piece of glass, offering you a wonderful clear view of the roaring fire. The efficiency is 76.9%. It is an Eco design stove, suitable for use in smoke control zones. There is a convection panel option available for this stove, called the Stock Cube convector. We have this listed separately.

Ecodesign

In order to be an Ecodesign stove, a stove must be independently verified to meet stringent emission requirements. Particulates or PMs are the most commonly recognised of these measures. The maximum limit for these is 40 mg/m³. This stove achieves 27 mg/m³. All other measures are all listed in our technical details table below.
