

Chilli Penguin "Woody" Eco Multifuel Stove

<https://www.calonyradref.co.uk/chilli-penguin-woody-eco-multifuel-stove>

If you have a big space in your life and you want to burn both wood and solid fuel, then this multi fuel version of Woody is the one for you. This stove allows you to reduce emissions and breath cleaner air but to have the choice of the fuel that you choose. Like its eco brother it is generously proportioned, yet slim, efficient, clean burning and quietly, modestly, magnificent.

To achieve lower emissions this penguin uses a combination of three features. Secondary heat retaining glazing, so the fire box stays hotter. Re-designed combustion air nozzles diffuse the incoming oxygen, allowing for a more complete combustion. Lastly the flow of air going toward the flue is interrupted, which increases the dwell time in the fire chamber, again contributing to more complete combustion.

Note this stove does not feature the catalytic converter feature, which is available on the [Woody Eco CAT wood burner stove](#).

The Woody Eco (Multi Fuel) is 83% efficient on wood and 87% efficient on anthracite.

This stove also has secondary heat retaining glazing, with air wash and a landscape view of the fire. It has the new stainless steel handle Chilli Penguin handle. There is an optional extra of extra height legs available.

Ecodesign

In order to be an Ecodesign stove, a stove must be independently verified to meet stringent emission requirements. Particulates or PMs are the most commonly recognised of these measures. The maximum limit for these is 40 mg/m³. This stove achieves 20 mg/m³, burning wood, 16 mg/m³ burning smokeless fuel. All other measures are all listed in our technical details table below.
