

Chilli Penguin "Penguin 7" Eco Wood Burning Stove

<https://www.calonyradref.co.uk/chilli-penguin-7-wood-burning-stove>

The Penguin 7 has a 7kW output with a large glass window. It uses the re-designed Chilli Penguin clean burn and air wash system, (the same as the Stock Cube series), giving a lovely clear view of the fire. Like all of our stove range, the Penguin 7 is very controllable.

This is 7 kW of warm, glowing, chilli-hot, heat. The generous clear glass window offers you a huge uninterrupted view of the fire and it has the added benefit of taking large logs. It is a wood only stove. Sleek in penguin black, delicious in charred red, sublime in seal grey.

This is a generous stove; it has big fire box for plenty of fuel, it throws out 7kW of chilli hot heat on a cold winter's night or a frosty Sunday morning..... and it lets you see it all happening. The generous wide screen glass gives you a wonderful big fire view. The simple styling means that the Penguin 7 works well in a fresh contemporary setting, but looks equally at home in a cosy, traditional room.

Air control

The Penguin 7 only has one air control knob, which makes it really easy to use. The single air knob provides boost air when fully open, and finer control when further in. A tool is provided to

use when the stove is hot.
