

Westfire Uniq 35 Ecodesign Wood Burning Stove

<https://www.calonyradref.co.uk/westfire-uniq-35-freestanding-ecodesign-wood-stove>

The modern closed-combustion firebox. The Uniq 35 brings a new style to the Westfire range, whilst boasting closed-combustion efficiency with its direct air fed fire chamber.

Its bold design not only looks great but maximises the energy you get out of every log with its efficient combustion system. This stove can also facilitate closed combustion by taking the air required for combustion directly from outside. All of this in addition to superb view of the fire, provided by the large glass, means that the Uniq.35 never fails to create a warming ambience in any room.

The Uniq 35 also has an optional plinth stand, giving extra height and allowing for safe and neat storage of your logs underneath.
