

Chesneys Salisbury 5 Remote-Controlled BioEthanol Stove

<https://www.calonyradref.co.uk/chesneys-salisbury-5-bio-ethanol-stove>

Clean and easy to install, a Chesneys Bioethanol stove is an ecologically friendly and efficient way to heat a room, burning fuel extracted from plants to produce a beautiful living flame.

Emulating the appearance of a conventional wood burning stove with mesmerising flames and a heat output of up to 3.5kw, an ethanol stove is the perfect alternative for those not wishing to lay and tend a wood fire.

The Salisbury BioEthanol stove sets a new level for the performance and use of Ethanol with state of the art technology in terms of safety, functionality and efficiency.

Unique features include a patented combustion process that allows a burn time of 11 ½ hours without the need to re-fuel and approval for installation in rooms much smaller than those required for competing ethanol products.

Not only this, but you also get:

- Beautiful living flame fire
- No chimney or flue required
- Fully remote controlled

- 100% energy efficient
- Automatic ignition
- A heat output of up to 3.5kw
- Pump operated automatic re-fuelling system
- Odourless in operation (unlike other ethanol burners)
