

Dean Forge Dartmoor Baker 5 Low/High Eco Cook Oven Stove

<https://www.calonyradref.co.uk/dean-forge-dartmoor-baker-5-eco-cook-oven-stove>

The Dartmoor Baker 5 Eco 5kw wood burning stove has an integral oven above the fire box utilising the heat from the fire to cook, bake, or warm delicious food.

The compact EcoDesign compliant stove, with a 5kw nominal output, has a good size oven and three shelf heights.

The Dartmoor Baker's have oven vents which allow the cooking smells and condensation to be drawn out of the oven and up the chimney. If you would like to use the top of the stove to warm a pan or boil a kettle then the use of the back flue outlet is recommended when installing the stove. Using the rear flue outlet will create a clear area, providing extra space and access to the hotter part of the top plate (near the back), a special Dartmoor Baker Eco back adaptor with flue cleaning access can be purchased to achieve this.

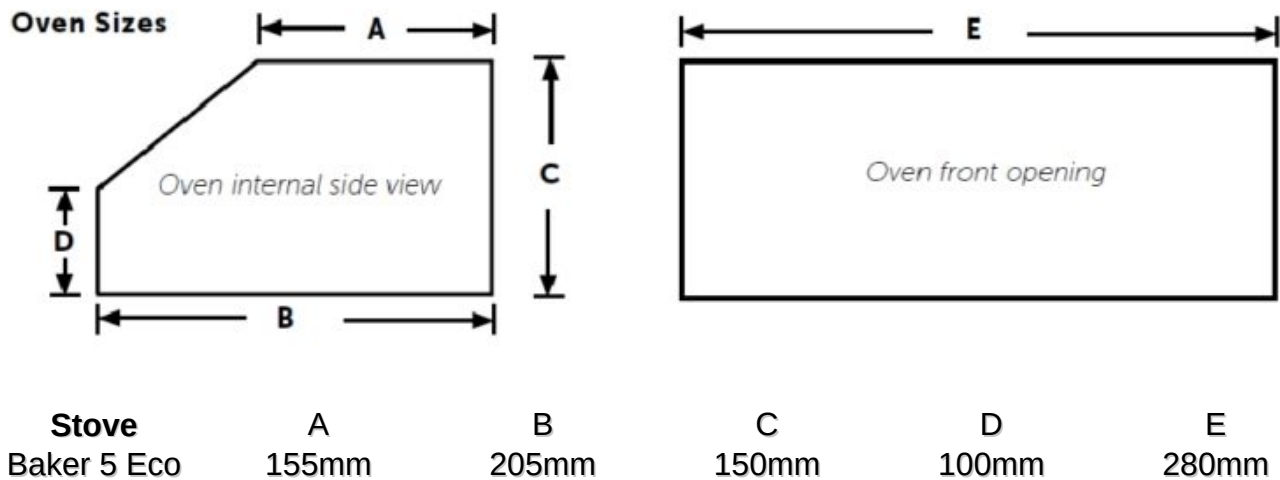

All the Dartmoor Baker Eco's stoves have a removable cleaning plate located inside the oven. This door provides a cleaning access to the top of the oven or for sweeping the chimney when fitted with a top exit flue.

The Baker Eco stoves are supplied with stainless steel handles only. The Baker 5 Eco is Eco 2022 compliant (Ecodesign Ready) and approved for the use in smoke control areas. Wood

burner or multi-fuel stove options available.

As seen in the main product photo, this stove also has the option to be manufactured with an **extended stove top**, providing a convenient 'overhang' to the side off the top of the stove. Note this is a permanent customisation and cannot be changed retrospectively, so please ensure you double-check your requirements before ordering.
