

Dean Forge 105 Eco Inset Wood & Multifuel Stove

<https://www.calonyradref.co.uk/dean-forge-105-eco-inset-wood-multifuel-stove>

The 105 Eco Inset wood burning multi-fuel stove, which is Eco-Design, is designed to be installed into a standard fireplace opening with the chair brick removed.

With its large curved glass window and powerful Airwash system, the 105 Eco Inset allows maximum view of the fire. The 105 Eco Inset has ducting built into all sides of the fire box encouraging cold air to be drawn into the underside of the stove, heated up throughout the ducting and naturally convected into the room through the top and side venting.

To further improve control and efficiency when burning wood, the 105Se Inset is fitted with the Dean Stoves wood burning plate as standard (this plate must be removed when burning solid fuel).

105 Eco Inset – Key Features

- Eco 2022 Compliant (Ecodesign)
- 5Kw nominal output
- Powerful Airwash system
- Large curved glass window

- Multi-fuel
- Double skin convector box to all sides of the fire box
- Approved, suitable for smoke control areas
- 125mm flue outlet
- Wood burning plate
- Energy Efficiency Rating A
