

ACR Woodpecker WP4LS Compact Wood Stove on Log Store

<https://www.calonyradref.co.uk/acr-woodpecker-wp4LS-small-wood-stove-on-log-store>

The Woodpecker WP4LS is a compact cast iron woodburning stove complete with a convenient integral log store. It's large glass door provides a fabulous view of the flickering flames.

"It's the perfect stove for freestanding installations and makes the perfect focal point for your modern room décor"

Defra exemption means it is able to burn wood in smoke controlled areas. It has some of the lowest clearances for any stoves in the UK and has the option to add Direct Air making it ideal for new build installations.

The Woodpecker WP4LS is the log-store version of the WP4 - the smallest of the stoves in the Woodpecker range. Fully constructed from cast iron, it packs a punch with it's nominal output of 4.3Kw and is suitable for woodburning.
