

[SALE] ACR Wychwood Remote Control LPG (Gas) Stove with Flame-Enhancing Glass

<https://www.calonyradref.co.uk/acr-wychwood-lpg-gas-clearance-discount-sale>

The interior of the stove is enhanced by the optional flame-enhancing black glass panel (**worth an extra £60 & included in this sale!**) which reflects the flames for more intensity. The Wychwood has an output of 6.1Kw and a high efficiency of 85%. Working off a balanced flue system, you'll find we do also list balanced flue kits from ACR.

This Gas stove creates a stunning focal point in any home – with it's clever styling, this model will suit both traditional and contemporary homes. The realistic ceramic logs have been chosen to ensure they not only give a most impressive flame effect when lit, they also look authentic when the stove isn't being operated. The flame effect is so realistic it is hard to tell that this isn't a real log fire.

Cutting edge technology

Full of cutting edge technology, the stove is supplied with a simple-to-operate remote control allowing you to turn the stove on and up & down.

For more information please view the manufacturer's manual
