

Clock Sudbury Compact Wood Burning Stove

<https://www.calonyradref.co.uk/clock-sudbury-compact-woodburner-stove>

Made in Britain, this compact variant of the ever-popular Sudbury range works perfectly in smaller fire chambers and in smaller rooms where space is at a premium.

With its simple magnetic catch pull-handle and single-control air flow operation this compact wood burning stove combines outstanding performance with an elegant and more minimalist design, which also helps simplify user operation for your convenience and comfort.

With an impressive heat output range of 3.5kW to 6kW, there's certainly no compromise on performance with this compact model! Plus, as with the whole Clock range, you can add that splash of colour with a beautiful array of finishes to choose from.

With the optional heat shield fitted the rear distance to combustibles is only 200mm on these stoves.
