

DRU Convexo Modern Cylindrical Gas Stove with Smart Control

<https://www.calonyradref.co.uk/dru-convexo-modern-cylindrical-smart-control-gas-stove>

With an all-new control system introducing modern innovative technologies, **the Convexo can be controlled via a smart app**, welcoming a whole new level of convenience and variability, saving you time, energy and money!

From both the remote control and the app, depending on which you prefer, you can **fully control the heat output and visual appearance** of the fire; particularly with the new **EcoWave** feature, creating diverse flame patterns whilst saving you up to 50% on your gas consumption.

Read all about the new DRU Eco Wave system here: <https://www.drufire.com/en-gb/about-dru/innovations/eco-wave>

Optionally the stove can be supplied with an **EcoGlow LED light fitting**, this is needed to make use of the 'EcoGlow' system if desired.

With the **Ceraglass upgrade**, the rear internal panel is made of reflective black glass adding to the intensity of the fire by reflecting the flame patterns.

Available in both **Natural Gas** and **LPG** models, the Convexo gas stove is a truly beautiful modern design, and whilst it certainly ticks the boxes of the more minimalist contemporary design, it still creates a bold statement and a stunning focal point for any room.

Standing proudly at over a metre tall, this freestanding gas fire gives a beautiful view of the flame picture with three panes. The fireplace runs on both **natural gas** and **sustainable bottled gas**, and thanks to the side view windows, the flames can be viewed from different locations around the fire, opening up many possibilities for location in the home.

This stove is designed to use a balanced flue system 100/150 (100mm internal, 150mm external) which can be supplied by DRU to your specification on request - please [contact us](#) if you require this.
