

DRU Polo Contemporary 3-Sided Gas Stove with Remote Control

<https://www.calonyradref.co.uk/dru-polo-modern-three-sided-square-gas-stove>

The DRU Polo is an attractive three-sided, freestanding gas fire. The Polo has an economical output of 4 kW, making it suitably efficient for well-insulated and small areas, such as kitchens, conservatories, or living rooms.

The black or ceraglass interior and decorative logs combine to provide the illusion of a natural fire. Both the exterior of the gas fire and its connecting materials are available in black. The Polo is supplied with a fully-featured remote control, incorporating electronic ignition, thermostatic regulator and timer.

Available for both Natural Gas (mains) and bottled LPG, the DRU Polo combines the beauty of a real flame fire, with the implementation of advanced technologies thanks to the innovative folks at DRU!

It is a freestanding, balanced flue stove with an impactfully bold 3-sided log fire display that will produce a comforting radiance all around your living room.

Controlable from a remote control handset, there is also a patch lead available for the more tech-savvy, which allows the stove to receive input control from a Smart Home, allowing the stove to be controlled from relay outputs on your Smart Hub.

This stove is designed to use a balanced flue system 100/150 (100mm internal, 150mm external) which can be supplied by DRU to your specification on request - please [contact us](#) if you require this.
