

DRU Diablo Floating 3-Sided Wall-Hung Gas Stove with Remote Control

<https://www.calonyradref.co.uk/dru-diablo-next-wall-hung-floating-gas-stove>

The DRU Diablo Next (which we'll simply call the Diablo!) is an impressively attractive three-sided wall-hung stove, which floats elegantly off-ground with no under-support and no need for a chimney breast or chamber.

This not only creates a beautiful effect for your living space but also allows for quicker and easier installation, and most importantly for you, it takes up less space.

Available in black anthracite or a metallic aluminium finish, matching flue covers are also available to create a seamless effect where it would suit the interior design scheme to do so - this can be ordered with us on a case-by-case basis depending on the proposed installation.

The Diablo has an economical output of 4.1 kW, making it suitably efficient for well-insulated modern homes or smaller rooms which may struggle to be comfortably functional with a higher output, like many modest-sized living rooms in our homes here in the Wales and the rest of the UK.

The black or ceraglass interior and decorative logs combine to provide the illusion of a natural fire, with the ceraglass upgrade reflecting more flames to create a fuller, more vibrant view of the fire.

The Diablo is supplied with a fully-featured remote control, incorporating electronic ignition, thermostatic regulator and timer.

Available for both Natural Gas (mains) and bottled LPG, the DRU Diablo Next combines the beauty of a real flame fire, with the advanced technologies of DRU you'll surely love!

It is a freestanding, balanced flue stove with an impactfully bold 3-sided log fire display that will produce a comforting radiance all around your living room.

Controlable from a remote control handset, there is also a patch lead available for the more tech-savvy, which allows the stove to receive input control from a Smart Home, allowing the stove to be controlled from relay outputs on your Smart Hub.

This stove is designed to use a balanced flue system 100/150 (100mm internal, 150mm external) which can be supplied by DRU to your specification on request, as well as colour-matched flue covers to match the stove finish - please [contact us](#) to discuss your flue requirements.
