

[SALE] ACR Wychwood Modern Wood Burning Stove

https://www.calonyradref.co.uk/index.php?route=product/product&product_id=489

Boasting one of the simplest door handle operation mechanisms, a gentle pull of the handle lifts the door off its magnetic catches, allowing the door to be freely opened with ease. This fantastic design along with the beautiful aesthetic of the stove itself, in our view makes it a great consideration, especially perhaps where users may have dexterity issues and may struggle with the more traditional mechanical door handle operation.

With its contemporary styling, the Wychwood wood burning stove creates a stunning focal point in your home. Supplied in matt black paint finish, this stove features a large glass door for an excellent view of the flames. With a **5Kw output**, the Wychwood is designed to burn exceptionally cleanly and with its outstanding efficiency, it is **EcoDesign Ready** and is **DEFRA exempt** meaning that you can burn wood in smoke controlled areas.

An optional pewter finish handle is available for this stove. When fitted with the optional heat shield, this stove can be installed 100mm away from combustible materials at the rear of the stove and 250mm away from combustible materials at the sides of the stove. Insulated flue pipe must be used to enclose the flue collar when doing this. Please note this is a wood burning only stove.
