

# Chilli Penguin "Fin" Inset Wood Burning Stove

<https://www.calonyradref.co.uk/chilli-penguin-fin-inset-cassette-wood-stove>

Introducing Fin, the inset or 'cassette' wood burning stove from Chilli Penguin.

The name comes from "Fits In" although penguins don't have fins, of course they have flippers, the merry folks at Chilli Penguin rightly felt it was still a part of that magical underwater marine world.

Fin is shy and introspective, preferring to be tucked in and out of the way. Once tucked in and feeling safe, he is big hearted and generous. He will throw out a surprising amount of toasty heat for a little stove.

He is a wood only stove but there is a smokeless kit available. There are also three choices of frame size.

Fin has 2 air controls and a boost disc, making him very controllable. There are convection slots at the base of the stove, they draw in cool air through the front of the stove, heat up the air, cycle it through the cassette and out into the room.

Fin is a wood only stove. There is a smokeless fuel kit available, that can be factory fitted when your order or it can be retro fitted at a later date. Please be aware that this will make it

SMOKELESS FUEL only, not multi fuel. There is also a WOOD ONLY kit available if your stove was originally ordered with a smokeless fuel kit factory fitted.

In addition there are 3 choices of surround/frame size; 50mm, 75 mm and 100mm.
